SIAM_
Hackathon 2023

25 & 26 February 2023

Transforming Industrial Solutions with Applied Mathematics

Many industrial companies are looking for emerging talents with a background in **computational science and engineering** who want to think about cutting-edge solutions to transform industrial solutions with applied mathematics.

During the two hackathon days **six different companies** will challenge the teams to come up with creative and innovative solutions. Do you think you have what it takes?

Participation is **free** of charge, but selection is competitive. During the day we will spoil you and take care of everything you need to become a hackathon hero! The winning team will be honored in a **prize ceremony** at the SIAM CSE 2023 conference (with 2000+ participants).

Register your ticket, and get ready for **THE biggest applied mathematics hackathon** of the world on Saturday 25 & Sunday 26 February 2023.

Get to know and network with leading industrial companies

€10.000 Prize money
